

Warthan Dermatology Center

MANDY WARTHAN, M.D.

MOLLY WARTHAN, M.D.

Dr. Mandy Warthan is excited to welcome her sister, Dr. Molly Warthan, to her practice at Warthan Dermatology Center. The Warthan sisters are both double board certified dermatologists. Dermatology runs deep in the Warthan family. The Warthan sisters grew up in a medical family; their father, Dr. Lynn Warthan, is a dermatologist in their hometown in Nacogdoches, Texas. They also have several generations of cousins who are physicians, too.

Dr. Mandy Warthan is board certified in dermatology and dermatopathology—fewer than three percent of dermatologists become dermatopathologists. Dermatopathology is focused on the microscopic diagnosis of skin cancers and moles. Dr. Molly Warthan is board certified in dermatology and fellowship trained in Mohs skin cancer surgery. Mohs micrographic surgery is a specialized type of skin cancer surgery that is used mainly for skin cancers on the head and neck and recurrent, complicated skin cancers. Dr. Molly Warthan did a one year fellowship in Mohs surgery and has extensive surgical training, including surgical reconstruction on the head and neck. Dr. Mandy Warthan is the only female dermatopathologist in McKinney, and Dr. Molly Warthan is the only Fellowship Trained Mohs Surgeon in McKinney. Together, they are pleased to offer patients the only dermatology center in the area to have dermatology, Mohs skin cancer surgery, and dermatopathology in one office.

Both sisters graduated from Southern Methodist University and completed medical school and internships at the University of Texas Medical Branch. Both Doctors Warthan have published extensively in academic journals and have been quoted in *The New York Times*. Dr. Molly Warthan had a scheduled appearance on the NBC Today Show. They are respected by their peers as accomplished dermatologists with genuine empathy for their patients.

Both doctors treat skin diseases in patients of all ages. Medical treatments include skin cancer surgery, mole removal, acne, rosacea, skin screenings, psoriasis, and eczema. Cosmetic services include Botox, Dysport, Juvederm and Restylane, Fraxel Laser Resurfacing for deep wrinkles and acne scars, Zeltiq Cold Fat Melting Laser, Laser Hair Removal, Photofacials, Spider Vein Treatment, Chemical Peels, Microdermabrasion, Skin Tightening, Facials, and Physician Grade Skin Care including Obagi and Neocutis. Complimentary skin care consultations are available with their aesthetician. Whether improving your appearance with small subtle changes or restoring your face to a more youthful glow, Warthan Dermatology Center focuses on combining the latest technologies and skin care to achieve your rejuvenation, so you can begin to look and feel your best. 📞
